U.S. Patent and Trademark OfficeRe: U.S. Patent Application No. 10/727,530
"Human Detection Method and Apparatus"
Our Reference: 1030681-000600

Dear Examiner Rahmjoo:

Thank you again for conducting an interview with me on Tuesday, February 5, 2008. I apologize for the delay, but I was not able to guess your e-mail address correctly, so I thought we would try to send it via facsimile.

Here are the changes to the independent claims I propose in response to your suggestion we could differentiate the claimed subject matter from the applied art by reciting that the face detection mode and the motion detection mode are concurrent. Please let me know if we have hit the mark, and I will file the changes in an amendment with an RCE after making sure the assignee is okay with the changes. I am confident that the client will agree.

Very truly yours,

Charles F. Wieland III
